In general, however, the treatment has been from a theoretical or academic point of view. In this volume the author has endeavored to present the subject in a simple, practical manner and from the standpoint of engineers who are actively engaged in making measurements, tests and investigations in the electrical industry. All classes of measurements that the laboratory and testing engineer is ordinarily called upon to make have been covered. The author wishes to acknowledge his obligation to the Electrical Testing Laboratories for much data and information made available to him; to Dr. C. H. Sharp and Mr. Gordon Thompson for reading portions of the proof and making valued criticisms; to those manufacturers who furnished electrotypes; and, finally, to express the most grateful appreciation to his friend Mr. Little M. Dudley for able and enthusiastic assistance in the preparation of the manuscript. The author will...
