

The Science of Life: Projects and Principles for Beginning Biologists

Filesize: 4 MB

Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

THE SCIENCE OF LIFE: PROJECTS AND PRINCIPLES FOR BEGINNING BIOLOGISTS

Chicago Review Press. Paperback. Book Condition: new. BRAND NEW, The Science of Life: Projects and Principles for Beginning Biologists, Frank G. Bottone, For ages 9-12. This activity book for budding biologists introduces kids to the five kingdoms of life through 25 engaging projects using materials commonly found around the house, yard, or classroom. Kids will learn how to conduct experiments using the scientific method in a carefully controlled environment. They'll make their own culture media and determine which is more effective at inhibiting the growth of bacteria: an antiseptic, a disinfectant, or plain soap and water. They will delight in collecting and comparing night-flying versus day-flying insects and learn how to clone a mushroom from a piece of its own tissue. Plenty of background information is provided, along with fun facts, a glossary, and wonderful Web sites to explore.
